

Appl. No. 10/719,962
Amdt. Dated 11/05/2004
Reply to Office Action of 8/05/2004

Amendments to the Specification:

Please replace the paragraph beginning at page 4, which starts with "Referring to FIGS. 1 and 2", with the following amended paragraph:

-- Referring to FIGS. 1, ~~and 2,~~ and 4, the clothing garment 10 includes a body 11 having a top end defining a collar receiving portion 12 that has a top edge portion 13 integral therewith. The top edge portion 13 includes a flap 20 integral therewith and foldable thereover.--

Please replace the paragraph beginning at page 4, which starts with "Still referring to FIGS. 3 and 4", with the following amended paragraph:

--Still referring to FIGS. 3 and 4, the attaching mechanism 40 includes a zipper 41 extending along a length of the collar member 30. Such a zipper is disposed on the rear side of the collar member, as perhaps best shown in FIG. 3. Of course, the attaching mechanism 40 may include conventional buttons for engaging the collar member 30 with the body 11, as well known to a person of ordinary skill in the art. The flap 20 is adaptable for extending ~~substantially vertically downwardly from~~ upwardly along the collar receiving portion 12 and terminating ~~below~~ over the attaching mechanism 40 so that the flap 20 can cover and extend along a length of the attaching mechanism 40, as perhaps best shown in FIG. 4. Advantageously, the flap 20 hides the attaching mechanism 40 so that a casual observer is not aware the collar is interchangeable.--
